

Product-Information

New from May 2006

WP 80 soldering iron

The new ergonomic and EGB save solder tool WP 80 from Weller offers the **plus of a variable tip - to - grip distance**. With this features the well tried 80 W silver line heater technology could used more universal.

The distance from tip to grip depends only 40 mm. These allows also fine solder jobs esp. under microscopes. With a second barrel the WP 80 could extend about 15 mm. The use of the valied LT soldering tip series can be used universally from extremely fine soldering jobs to those where more power is required.

From May 2006 the WP 80 is part of the solder units WD 1000

Technical Data

Antistatic model

Voltage: 24 Volt AC

Power: 80 Watt

Heat up time: 10 sec. (50-350 C°)

Product benefit of WP 80

- Short tip to grip distance of 40 mm for fine solder jobs
- Low heat up of the grip
- Extendable with second barrel
- Weight only 96 g

The WP 80 soldering set consists of

- WP 80 soldering iron 80 W, 24 V with barrel short (40 mm) and soldering tip LT B
- Safty rest WDH 10 adjustable in 4 steps

Accessory

- Barrel long (55mm) 005 87 448 46
- Fume extraction kit 005 29 182 99

Order numbers

- WP 80 soldering set 005 29 181 99
- WP 80 soldering iron 005 29 180 99
- Barrel short (40mm) 005 87 448 45
